Guest Speakers

Donnybrook Balingup Community Radio Barry trained as a radio technician. I was involved with community radio when we were living on Cocos Island and saw what a powerful community building tool it was. Having been a Lions member for over 30 years, I understand the importance of community organisations and believe that the radio service will be valuable to all who want to promote their activities, as well as catering for a wide range of musical interests.

Every Daughter Matters is an Australian-based anti-human trafficking NGO that partners with Aashish Social Services Nepal to run thirteen border crossings stations along the southern border of Nepal along with thirteen emergency accommodation shelters and two safe houses.

“Human Trafficking is an evil that erodes personal dignity, shatters lives, and destroys the moral fabric of society.

The 1758km-long border between India and Nepal has been identified as one of the busiest human trafficking highways in the world,” said Darren. “Because we believe every daughter is priceless, is deserving of respect, dignity, and value, Every Daughter Matters is committed to seeing the trade of young Nepali women and girls interrupted and ultimately eradicated.”
